EXPERIENCE

API DEVELOPMENT WITH PYTHON AND FLASK - UDEMY   Jan 2025 – Present
- Developed and deployed RESTful APIs using Flask, implemented authentication, routing, and database connectivity.
- Containerized backend applications with Docker, ensuring consistent environments and simplified deployment workflow.
- Tested APIs to enable secure, efficient communication between frontend and backend systems.

BACKEND DEVELOPMENT – ALTSCHOOL AFRICA   Dec 2023 – May 2024
- Wrote efficient code in Node.js and Express.js to handle the server-side logic of an application.
- Optimized the database Schema and queries to improve data retrieval speed for the application.
- Conducted unit tests to ensure the software was free of bugs before its release.
- Integrated encryption and secure authentication protocols to safeguard user data in the application.

WEB DESIGN (FIGMA) – UDEMY   Jan 2023 – March 2023
- Created wireframes and interactive prototypes to visualize and test design concepts before development.
- Conducted thorough user research through surveys to understand user needs and preferences.
- Designed layout and animations visually in Webflow, which is much faster than coding from scratch.

FRONTEND DEVELOPMENT – SOFTICU TECH HUB   July 2022 – Dec 2022
- Expertly used HTML, CSS, and JavaScript to create a re4sponsive design, providing an optimal experience across devices.
- Optimized images and scripts to improve web performance and reduce loading times.
- Used Git for version control, managing code changes, and collaboratively effectively with my team.

LATEST PROJECTS

HEALTH STREET | Private
